

Strip LED Flex | PRATIKA LINEAR

Strip LED Flex

Product characteristics

- LED module with silicone protection is made of flexible printed circuit and developed to satisfy with extreme adaptability and versatility the lighting requirements of complex structures that need to illuminate and highlight spaces and small elements, with narrow or curvilinear configuration.
- The strip LED can be surfaced-mounted with the additional of optional accessories – clips and rigid channel – for safer fixing.
- Plug and play system facilitates toolless mounting.
